“ELMED” NORM CONTAINER SYSTEM, STERILOCK™ FOR SURGICAL INSTRUMENTS

With the increase of surgical operations and the consequential number of surgical instruments in circulation, a more cost effective and speedy processing system is essential. Additionally, many surgical instruments have become more delicate and thus, much more expensive.

Another extremely high cost is the hospital operating room time and, of course, the time of the surgical personnel. All of these factors led to the development of the “ELMED” NORM CONTAINER SYSTEM, STERILOCK™.

Half Size Norm Container

List No. MT55001-07 12”L x 12”W x 3”H (30 cm x 30 cm x 7 cm), one basket unit

List Price **\$370.00**

Special Price **\$100.00**

Full Size Norm Container

List No. MT55002-07 24”L x 12”W x 3”H (60 cm x 30 cm x 7 cm), one basket unit

List Price **\$535.00**

Special Price **\$150.00**

Standardized aluminum containers with stainless steel lids and disposable filters are utilized for the complete processing of surgical instrument packs from the sterilizer to the sterile supply area, through surgery, and returning again to the washing and sterilizing facilities. Complete instrument sets are stored in these containers which are identified by special markings or color coding so that they are available for immediate use without the guess work.

With the “ELMED” NORM CONTAINER SYSTEM, STERILOCK™, cost containment will be implemented as all the instruments in the operating room are centrally stored, located and transported, eliminating the costly wrapping. You owe it to yourself to investigate how the “ELMED” NORM CONTAINER SYSTEM, STERILOCK™ will benefit your institution.

MEDTEC APPLICATIONS INC.,

Telephone Number: (630) 628-7180

Web Site: www.medtecapp.com

50 West Fay Avenue,

Addison, IL 60101-5106 USA
